

ARTIFICIAL INTELLIGENCE ASSUMPTION OF RISK & DISCLAIMER

CA SOLUTIONS LLC AI DISCLAIMER ADDENDUM

1. ACKNOWLEDGMENT OF PROBABILISTIC SYSTEMS

The Client expressly acknowledges that the Services provided by CA Solutions LLC involve Artificial Intelligence (AI) and Large Language Models (LLMs). These systems are probabilistic, not deterministic. Consequently, the AI agents may generate outputs that are inaccurate, fabricated, logically inconsistent, or contextually inappropriate (commonly referred to as "hallucinations").

2. NO PROFESSIONAL OR FIDUCIARY ADVICE

THE OUTPUTS GENERATED BY THE COMPANY'S AI AGENTS DO NOT CONSTITUTE PROFESSIONAL ADVICE. The AI Services are not a substitute for licensed legal, financial, medical, tax, or engineering counsel. CA Solutions LLC assumes zero fiduciary duty to the Client or the Client's end-users. Any reliance on AI-generated output is strictly at the Client's own risk.

3. MANDATORY HUMAN-IN-THE-LOOP VERIFICATION

The Client agrees that it is their sole operational responsibility to establish and maintain "human-in-the-loop" oversight. The Client must independently verify the accuracy, legality, and safety of all AI-generated outputs before deploying such information in a commercial environment or communicating it to third parties.

4. BIAS AND UNPREDICTABLE BEHAVIOR

While CA Solutions LLC implements structural guardrails, the Client accepts that foundational AI models may inadvertently produce outputs exhibiting bias or objectionable content. The Company shall not be held liable for any reputational, financial, or operational damages resulting from the unmoderated deployment of our AI agents.
